

How to Add a Link List. A “Link List” shows the title for each of your posts. Each title is linked to the post. When the title is clicked the page for that post will open, as shown in this sample from my blog.

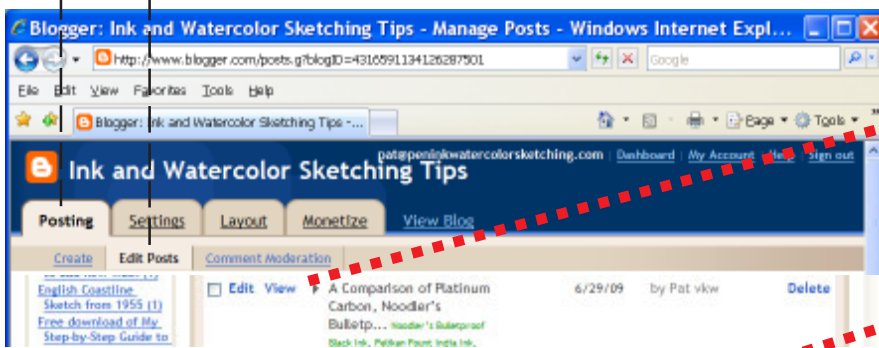

1. Go to your “Dashboard”, select “Layouts” and “Page Elements.”

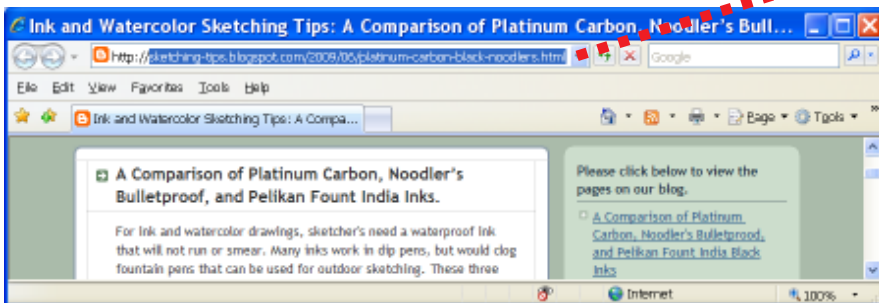

For information that should be entered on the “Link List”, see step 3. on the following page.

How to find the information that should be entered in the “Configure Link List” box.

With the “Configure Link List” box open, go to your Browser’s Menu bar and click on File>New Window. A duplicate of your current window will open. Click on the “Posting Tab” and “Edit Posts.”

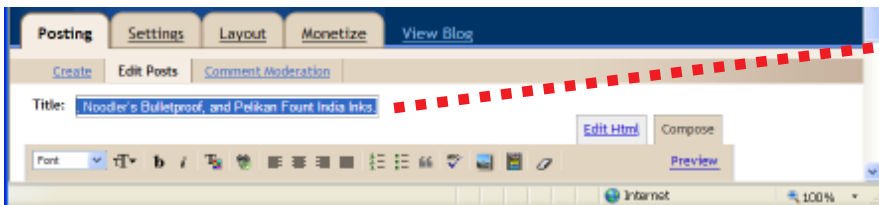

3. Click on View as shown next to the Title of your post.

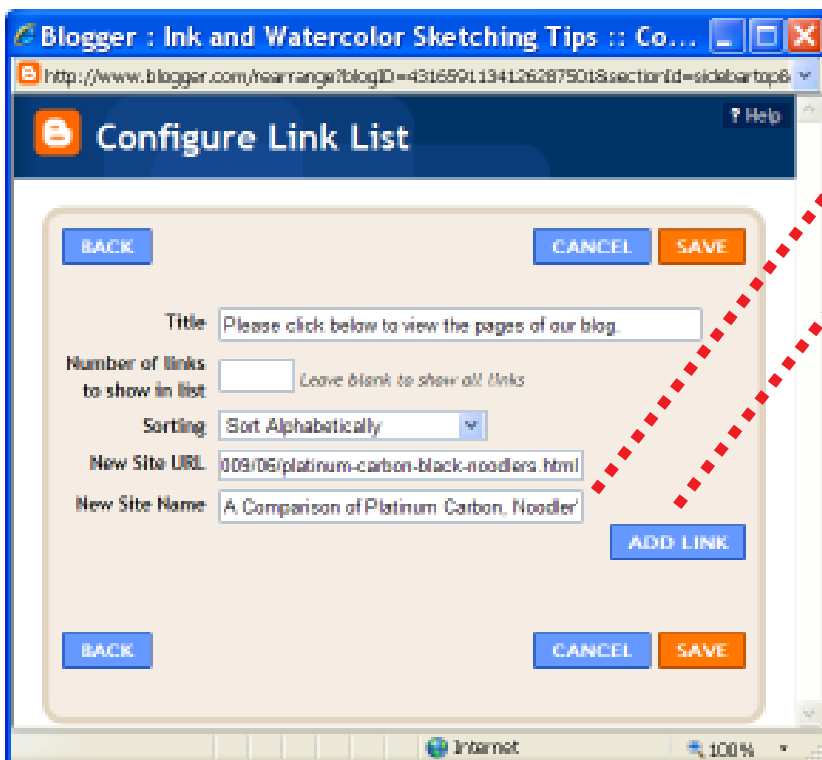

4. Your post opens in your browser with the URL information after “http://”, as shown at left. Highlight and copy it. Return to your “Configure Link List” box, as shown below, and paste it after the “http://” entry in the “New Site URL” slot.

(I copied and pasted “sketching tips.blog spot.com/2009/06/platinum-carbon-black-noodlers.html”)

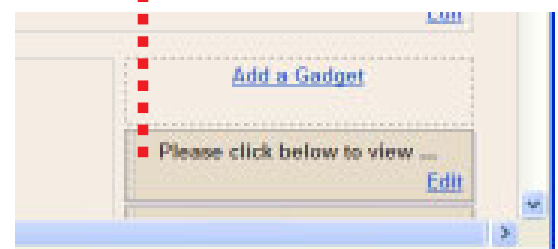

5. Return to the “Posting Tab” and “Edit Posts” as shown in step 3. above. Click on Edit next to the Title of your post. In the Edit Posts window, highlight the Title of your post and copy it.

6. Return to your “Configure Link List” box and paste the Title of your post in the “New Site Name” slot. Click ADD LINK.

7. Your first post has been added to your “Link List.” You can then add your other posts in the same way.

Your “Add a Gadget” column shows the Title of your “Link List.”
